

You are invited to a presentation on NUPLAZID[®]:

Considerations in Long-term Care: Managing Hallucinations and Delusions in Residents With Parkinson's Disease Psychosis

Presented virtually by

Fahd S. Amjad, MD

Assistant Professor
Department of Neurology, Division of Movement Disorders
Co-Director
Huntington's Disease Center of Excellence
Georgetown University Hospital
Washington, DC

Meeting Details

Thursday, July 28, 2022 | 12:00 PM EST

Virtual program offered through Zoom, please register below.

Presentation Overview

- Educational information about hallucinations and delusions associated with Parkinson's disease (PD) psychosis, including:
 - What is PD psychosis?
 - Why does PD psychosis matter?
 - How do I recognize psychosis in my residents with PD?
 - How should I approach hallucinations and delusions associated with PD psychosis clinically?
- Learn more about the efficacy and safety of NUPLAZID as a treatment option for hallucinations and delusions associated with PD psychosis

Space is limited, so register now.

Please note: This program is subject to cancellation.

Indication

NUPLAZID is indicated for the treatment of hallucinations and delusions associated with Parkinson's disease psychosis.

Important Safety Information

WARNING: INCREASED MORTALITY IN ELDERLY PATIENTS WITH DEMENTIA-RELATED PSYCHOSIS

- Elderly patients with dementia-related psychosis treated with antipsychotic drugs are at an increased risk of death.
- NUPLAZID is not approved for the treatment of patients with dementia-related psychosis unrelated to the hallucinations and delusions associated with Parkinson's disease psychosis.

See additional Important Safety Information located on reverse. Please read the accompanying full [Prescribing Information](#), including **Boxed WARNING**, also available at NUPLAZIDhcp.com.

Important Safety Information (cont'd)

Contraindication: NUPLAZID is contraindicated in patients with a history of a hypersensitivity reaction to pimavanserin or any of its components. Rash, urticaria, and reactions consistent with angioedema (e.g., tongue swelling, circumoral edema, throat tightness, and dyspnea) have been reported.

Warnings and Precautions: QT Interval Prolongation

- NUPLAZID prolongs the QT interval. The use of NUPLAZID should be avoided in patients with known QT prolongation or in combination with other drugs known to prolong QT interval including Class 1A antiarrhythmics or Class 3 antiarrhythmics, certain antipsychotic medications, and certain antibiotics.
- NUPLAZID should also be avoided in patients with a history of cardiac arrhythmias, as well as other circumstances that may increase the risk of the occurrence of torsade de pointes and/or sudden death, including symptomatic bradycardia, hypokalemia or hypomagnesemia, and presence of congenital prolongation of the QT interval.

Adverse Reactions: The common adverse reactions ($\geq 2\%$ for NUPLAZID and greater than placebo) were peripheral edema (7% vs 2%), nausea (7% vs 4%), confusional state (6% vs 3%), hallucination (5% vs 3%), constipation (4% vs 3%), and gait disturbance (2% vs <1%).

Drug Interactions:

- Coadministration with strong CYP3A4 inhibitors (e.g., ketoconazole) increases NUPLAZID exposure. Reduce NUPLAZID dose to 10 mg taken orally as one tablet once daily.
- Coadministration with strong or moderate CYP3A4 inducers reduces NUPLAZID exposure. Avoid concomitant use of strong or moderate CYP3A4 inducers with NUPLAZID.

Dosage and Administration

Recommended dose: 34 mg capsule taken orally once daily, without titration.

NUPLAZID is available as 34 mg capsules and 10 mg tablets.

Please read the accompanying full [Prescribing Information](#), including **Boxed WARNING**, also available at NUPLAZIDhcp.com.

Speaker Program Guidelines

A meal may be offered. Alcohol will not be provided.

Acadia Pharmaceuticals is pleased to sponsor this program to provide information consistent with industry guidelines. This program is not an accredited CME program and is not designed to meet any training and/or educational requirements. In accordance with the PhRMA Code on Interactions With Health Care Professionals, attendance at this educational program is limited to only Health Care Professionals (Physicians, Nurse Practitioners, Physician Assistants, RNs, Clinical Pharmacists, Social Workers). Accordingly, attendance by guests or spouse is not permitted.

To comply with certain federal, state, and local laws that prohibit or limit the provision of meals to health care professionals and/or state employees, Acadia Pharmaceuticals does not offer a complimentary meal to individuals who are subject to such restrictions. Attendees to whom such restrictions apply should not avail themselves of the complimentary meal. Please note that Acadia Pharmaceuticals is required to report the value of a provided meal pursuant to applicable federal and state laws.

This invitation is non-transferrable.
